1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

2. The Information Disclosure Statement submitted by Applicant on June 24, 2004 has been received and fully considered.

3. The following is an examiner's statement of reasons for allowance:

The closest prior art to the present invention is Ebel (U.S. Patent No. 6,160,733). Ebel disclosed a static random access memory having row pre-decoders and decoders coupled to a plurality of word lines, precharge devices coupled to a plurality of pairs of bit lines. Ebel failed to show or suggest the limitations of each of pairs of bit lines having first capacitance value, each memory cell includes first and second inverters each of which has a load element and a drive element and which are cross-coupled, a first storage node connected to an output node of the first inverter and an input node of the second inverter and having a second capacitance value which is equal to or larger  $1/8$  of the first capacitance value, and current drivability of the drive element is lower than twice of current drivability of the first and second gate elements.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
